

Uniform ($a=0, b=1$): $P(u) = \frac{1+u}{2u}$

Exponential (λ): $P(u) = 1 - \frac{1}{\log(1-u)}$

Pareto I ($\beta=1, \alpha$): $P(u) = \frac{\alpha}{\alpha-1}$

Power (a, β): $P(u) = \frac{\beta(1-u^{1+1/\beta})}{(1-u)u^{1/\beta}(\beta+1)}$
